

JOB001 Executes 4 Steps in Sequential Order

JOB001 is a batch job that processes employee and payroll data through four distinct steps.

Job Flow

JOB001 Job Flow		
Step Name	Program	Datasets
CUSTSTEP	CUSTOMER	EMP.RAW.INPUT
PAYSTEP	PAYROLL	EMP.RAW.INPUT
RPTSTEP	REPORTGEN	EMP.RAW.INPUT
SORTSTEP	SORT	EMP.RAW.INPUT

Step 1: RPTSTEP - Runs **REPORTGEN** program to generate reports

Step 2: SORTSTEP - Runs **SORT** program to sort data files

Step 3: CUSTSTEP - Runs **CUSTOMER** program to process customer data

Step 4: PAYSTEP - Runs **PAYROLL** program to process payroll transactions

Key Datasets

The job accesses multiple datasets including:

- **EMP.RAW.INPUT.FILE** and **EMP.INPUT.FILE** (employee input data)
- **PAYROLL.LOADLIB** and **CUSTOMER.LOADLIB** (program libraries)
- **EMP.OUTPUT.FILE** (processed employee data)
- **CUSTOMER.INPUT.FILE** (customer input data)
- **PAYROLL.DAILY.REPORT** (final payroll report output)

This job orchestrates a complete payroll processing workflow, from data sorting through customer and payroll processing, culminating in report generation.
